

# CAL FIRE AGREEMENT FOR USE OF RADIO FREQUENCIES

8036

(No. 28 October 2014)

The CAL FIRE Agreement for Use of Radio Frequencies is used to grant permission to another agency to transmit on one or more of CAL FIRE's frequencies. Typically, it is prepared by the unit TCO (ECC Chief) in response to a specific need for improved operational communications with local fire districts or departments, timber companies, etc. After the Agency representative, Unit ECC Chief and Unit Chief have signed the agreement, the Agreement is forwarded to the Senior TCO / Telecommunications Manager in Sacramento to process and obtain required approval by the Deputy Director for Fire Protection. After all signatures and approvals are completed, copies will be made of the agreements. The original will remain on file in the Sacramento Telecom office, and the copies will be sent to the Unit, for their agreement file and given to the agency that has been granted permission to use the CAL FIRE channels.
